BUMATEC Screw Air Compressor

BUILT ON TRUST

Last Updated MAY 2016

Direct Drive Coupling Type BFD37

Quiet Operation

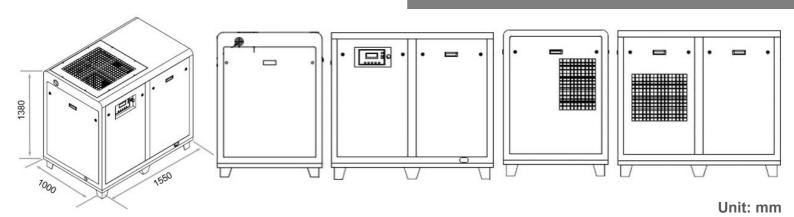

Bumatec airend provide much low noise during its operation through unique design and double wall housing structure. The silencer and centrifugal fan were installed according to simulation design of airflow which is able to reduce air friction noise remarkably. And unique quick ventilation valve was installed which was designed to remove unloading noise. Bumatec compressor guarantee the sound proof under 70dB.

High Efficiency

Bumatec has developed big size screw rotor of airend through high accuracy machining process and finally achieved the best clearance of the rotor which is able to provide the highest airflow rate in the world. Airflow of Bumatec air compressor is relatively much more than others.

Maintenance-friendly Design

Bumatec air compressors have maintenance-friendly designs. All the parts are assembled in simple arrangement for easy maintenance such as application of hinge door covers to saves maintenance time, reducing numbers of bolts to oil filter cover and application of o-ring to oil filter to improve life cycles. And it is easy to clean the inside of air compressor when it is dirty.

BUILT ON TRUST

Basic Environment

Specification

6.2 m³/min Free Air Delivery **Working Pressure** 8.0kgf/cm² **Cooling Method** Air Cooled by Cooling Fan **Outlet Air Temperature** Ambient Temp. 15°C (Approx.) **Direct Drive Coupling Type (1:1) Drive Method** Oil Volume 20€ Soundproof Under 72dBA **Pipe Connection** 32A G1-1/2" Outlet

Components

Electric Motor

Model Y2-180L-2
IP Class IP54
Operation Mode S1, Continuous
Operation Mode

Rated Output 37kW (50HP)

Service Vector 1.2

Electricity AC415V / 50Hz / 3Ph
Pole / RPM 2Pole / 2940rpm

Start Method Y-Delta
Lubrication CHERROM
Cooling Method Fan Cooled (Built-in)

Airend

Model 3.47.070006
Compression Oil Flooded
1-stage Compression

 $\begin{array}{lll} \mbox{Rotor Combination} & \mbox{5 x 6 (Male x Female)} \\ \mbox{Pressure Range} & \mbox{5} \sim 13 \mbox{bar} \\ \mbox{Operation Speed} & \mbox{2940rpm} \end{array}$

Pneumatic & Electric Valves

Intake Valve Air Filter

HX DN65 2μm/min. 99.8% (3ppm)

Thermostatic Valve **Minimum Pressure Valve Safety Valve**

A28X-16T (DN20)

Purge Valve

DB LHGL-20C

Solenoid Valve

- For Control of Intake Valve and Purge Valve

Lubricant Oil Circulation

0	00	٦.	N 160
- ()	α	\ I C	יונ

1 set

- **Aluminum Fin Radiator Type**
- Cooling for both Air & Lubricant Oil

Oil Filter & Housing

1set

Cooling Fan (Motor AC380V)

Low Noise Centrifugal Type

1set

PLC Display Controller

Comprehensive Abnormal Display All Safety Production Prompted Alarm Important Operation

Type Electricity

Control Method

Micro Controller (LCD) AC415V, 3Ph (Transformer Built-in) Loading & Unloading

- ✓ Auto Running / Stop Control **Temperature / Pressure Display Control**
- ✓ Timer Running / Stop Control
- ✓ Master / Slave Interlock Control

Functions

Error Detecting Function

- **▼** System Trip & Warning Function
- √ High Discharge Air Temperature
- ✓ Main Motor Overload
- ✓ Fan Motor Overload
- ✓ Pressure & Temp. Sensor Failure

Auto-Control Function

- √ Stop Delay Function
- √ Re-start Pressure
- ✓ Automatic Start

Maintenance Function

- ✓ Air Filter Changing Warning
- ✓ Oil Filter Changing Warning
- ✓ Air Oil Separator Changing Warning

Operation Status Display

- ✓ Outlet Air Pressure
- ✓ Outlet Air Temperature
- ✓ Operation Mode
- ✓ Load / Unload Status

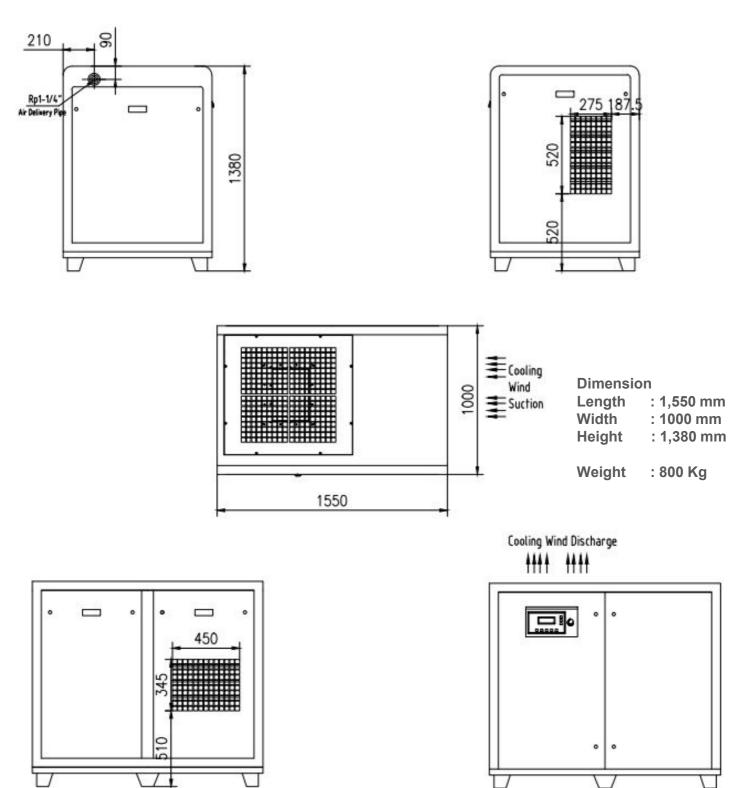

Tracking Record Function

- ✓ Amot Clock (Automatic Time)
- √ Total Operation Time
- ✓ Load / Unload Time
- ✓ Set Stop Delay Time
